DUALITE™ LED

This unique and creatively designed DUALITE™LED combines both esthetics and functionality in one. The new technology allows the user to change the color settings of the lamp to the suitable "color of the day". You can simply by pushing a button, change from warm white to white color of the light. The modern dimmer also allows you to set the preferred strength of the light, you can change from soft, mid or strong light at your own convenience. On the DUALITE™LED we have used the overall ruling and patented LGP Technology (Light Guide Panel), this allows for glare free, shadow free and flicker free lighting. Problems with overlapping lights are avoided. The perfect counter balanced arm of modern and sleek design guarantees smooth operation for many years to come and is also combined with power cord management.

The DUALITE™LED is made of recyclable material and could be reused after recirculation process. The long life span is in consistency with the spirit of green design.

Technical features:

- ▶ Environmentally friendly due to low power consumption, long life span and recyclable material. Green manufacturing process.
- ▶ LGP Technology. Light Guide Panel Technology.
- ▶ Shift between warmwhite (2800K) and white (6000K) due to color changing technology.
- ▶ Shift between soft, mid or strong light due to dimmer function.
