Edge & Round

Working with HIGH POWERED LED technique in office desk lighting provides huge advantages such as the possibility to work with very sleek and modern design, extremely environmentally friendly due to the very low power consumption and ultramodern lighting technology. The version is also equipped with a dimmer function to set the correct light at any occasion.

The arm is in high grade brushed aluminium to provide stability and the design. The joints are made of cast iron to provide the maximum stability and long lasting product.

Due to this combination of technique and design you get the absolutely most modern and state of the art desk lighting.
