- › INZONE™Mouse, wireless art.no.: 410700

INZONE™ Mouse

The INZONE™Mouse has an innovative approach to traditional computer mouse work. The INZONE™Mouse has a unique angle, perfect size and the only vertical mouse where the thumb placement is not predetermined by the design of the product. This is achieved through the thumb scoop that allows the user to decide the most comfortable hand position.

The angle of the INZONE™Mouse ensures rotation of the forearm is minimized and the hand is in neutral position between vertical and horizontal. The comfortable textured surface follows the contours of the hand so only a light grip is required to maneuver the mouse. The INZONE™Mouse comes in both wired and wireless version.

Sun-Flex™ is a corporation with focus on developing, manufacturing and distribution of products for the modern office workplace. With over 20 years experience and understanding of the modern office workplace, Sun-Flex™ has gained a respected leadership position in the industry. Sun-Flex™ has a strong international presence and is well represented in Asia, Europe and North America through a refined network of distributors and dealers.
