With over 20 years experience and understanding of the modern office workplace, Sun-Flex™ has gained a respected leadership position in the industry. Sun-Flex™ has a strong international presence and is well represented in Asia, Europe and North America through a refined network of distributors and dealers.*

## INZONE™ keyboard

The new INZONE™ keyboard is a natural shaped keyboard with angled keys that reduces the risk for RSI (Repetitive Stress Injuries) when typing. The research shows that when typing on the INZONE™ keyboard the arms and hands are positioned in a very relaxing and natural angled position that encourages good posture. Due to its slim profile it reduces the typing noise and is ideal for fast typing and at the same time the hands and wrists are maintained in the natural and relaxing position. The compact layout is superb for space saving and also lets the user work within their natural shoulder width that is crucial in order to minimize the risk of static tension in neck, shoulders and arms. The layout of the INZONE™ keyboard is also optimized with a large Enter key in order to improve efficiency when typing.

The INZONE™ keyboard has a "spill proof" structure in order to prevent damages by accidental liquid spilling and in order to enhance the durability of the keyboard. The keys are laser inscribed so that you will never lose identity of each and every individual key.

The INZONE™ keyboard is ideal as a "stand alone keyboard" and is also very well suited to work in combination with a central pointing device such as the NomusNavigator™ or similar. It comes in different language layouts.
