

# Lumbar Support

## Lumbar Support

The Lumbar Support is an adjustable support for the back in Memory Foam material. The Lumbar Support is designed to alleviate lower back pain and improve posture and it provides soothing support and stress relieve for back muscles and discs. It also assures that correct spinal alignment is obtained. The material is a high density Memory Foam that provides a soft, yet firm support to the back. The Memory Foam was originally developed by NASA during the 1970's to minimize the gravity pressure and as to give the astronauts a better sit comfort. The material has since been further developed and is now frequently used for treatment against neck-and back problems. The Memory Foam is covered in a black Lycra® stretch cover that can easily be removed. There are two straps with fasteners on the product with stretch functions and therefore the Lumbar Support can be used on any chair and even in the car.

The shape of the Lumbar Support is designed to give optimum support where most needed and yet provide a stable and comfortable feeling throughout the whole day.

### Specifications:

- › Materials: High density Memory Foam Lycra® stretch cover.
- › Colour: Black.
- › Two sets of stretch straps with fasteners.
- › Shipped in masterpack of 20 pcs.
