

# Vertical Mouse

## Vertical Mouse and Vertical Mouse Wireless

The Vertical Mouse has an innovative approach to traditional computer mouse work. The Vertical mouse has a unique angle and is the only vertical mouse where thumb placement is not predetermined by the design of the product. This is achieved through the thumb scoop that allows the user to decide the most comfortable hand position.

The angle of the mouse ensures rotation of the forearm is minimised and the hand is in a neutral position between vertical and horizontal. The comfortable textured surface follows the contours of the hand so only a light grip is required to manoeuvre the mouse.

Both wired and wireless version.

art. no. 410400

art. no. 410600

### Technical features:

- ▶ Operates with wire or wireless function, dpi of 800.
- ▶ Constructed with the so called "handshake" mould for best possible ergonomics.
- ▶ Silver painted "no tear" colour.
- ▶ Black "rubber paint" "no tear" for best comfort on the frequently used positions.
- ▶ 1,5 meter range, 3,7V rechargeable battery (no need to take out), USB cable charger included (wireless version only), works with all Windows operating system from W95 and forward as well as for Mac
- ▶ Operates also with the following: PS/2 adapter, via USB Hub and via KVM switch.
