

## PRODUCT INFORMATION

SLIMLITE™ is a newly developed product that utilizes the well-known, highly professional light dispersion enhancing technology LGP (Light Guide Panel).

The LGP technology developed by Sun-Flex® enhances the light dispersion, minimizes heat accumulation and is UV and flicker free. Due to the extra long and flexible arm (1020 mm.), SLIMLITE™ can be used over large areas and thus provide the user with sufficient light.

The CRI (Colour Rendering Index) topping over 90 also enhances colour contrasts and is very similar to daylight lighting.

With the unique and modern touch sensors you control all settings such as dimmer functions, colour temperature settings and on/off functions. Using these settings you can create your individual light at any time.
