

Wobble.

Work your core!

PRODUCT INFORMATION

When choosing the SUN-FLEX® Active chair, you are making a clear statement about your health, well-being and comfort in the long term.

With the SUN-FLEX® Active chair you can intuitively stimulate your core muscles, strengthen your back and increase your blood circulation. We recommend that you sit with your feet balanced on the base. This puts your body in a posture similar to when bicycle- or horseback-riding. The active sitting function is provided by the dome-shaped base while the chair's height provides the benefit of an increased hip angle.

Due to the superior choice of quality materials and simplicity of use – to adjust the height, you simply pull the lever under the seat – the SUN-FLEX® Active will be a natural part of your workplace for years to come and we promise that you will feel the difference. We recommend that you alternate active sitting on the SUN-FLEX® Active with active standing on the SUN-FLEX® StandMat™ Boost.

Grooved rubber lining provides anti-slip function.
