

FOREARMSUPPORT PLUS

PRODUCT INFORMATION

SUN-FLEX®Forearmsupport PLUS sets a new groundbreaking standard for supportive forearm supports.

Thanks to its soft yet firm support for the forearms, it provides relief during work with both traditional and centered mice. By relieving the shoulders and upper back, the risk of strain injuries is minimized.

The adjustable width and depth of the brackets offer highly flexible attachment, independent of table thickness, edges, corners, or curves. The brackets are delivered with different screws for individual choice of attachment. The waist depth is only 40 mm, allowing you to work close to the task at hand.

The cushioning material and surface finish are top of the class, and SUN-FLEX®Forearmsupport PLUS is easy to clean, even with disinfectants.
