

PRODUCT INFORMATION

The SUN-FLEX® Footsupport encourages you to adopt the correct posture at your workplace – helping you to avoid back and leg pain.

To adjust the position of the foot support, simply press it with your foot. It will then remain in that position until you adjust it again using the same method. The reason for this is that the support features a cradle mechanism with finely balanced resistance.

When you adjust and angle the foot support by pressing it, this provides good exercise for your lower extremities, stimulating blood circulation and helping to prevent thrombosis.

The patterned top surface ensures you maintain solid contact and can even massage your feet slightly if you take your shoes off when using the foot support.

Thanks to the robust and sturdy metal structure – which ensures a long service life for the product – this foot support withstands heavy loads and provides a solid base.
